

World Robotics 2008 will be published on 15 October 2007!

In 2007, industrial robot sales increased worldwide by 3%. As in recent years, the results in the major regions were quite different: Decrease in Asia, recovery in the Americas, continuing growth in Europe.

Sales to the automotive industry, the machinery industry, the metal products industry and the food industry increased. **The worldwide operational stock of industrial robots will increase from 994,000 units in 2007 to 1.2 million units in 2011. Up to the end of 2007 about 5.5 million units of service robots were sold, at least 12.2 million are expected to be sold between 2008 and 2011.** More details will be published in World Robotics 2008.
